## Module 1: Assessment (Graded)

LATEST SUBMISSION GRADE

100%

1. What term corresponds to the definition, “a duty that a person takes on or plays”? 1 / 1 point

- ☐ Work Product
- ☐ Milestone
- ☐ Task
- ☒ Role

**Correct**

Correct answer. A role is a duty that a person takes on or plays.

2. Which of the following is an example of a milestone? 1 / 1 point

- ☐ The end of a two week sprint.
- ☐ The date the product is due to be released.
- ☐ One month after the beginning of the project.
- ☒ When the project is ready to be released.

**Correct**

Correct answer. When the project is ready to be released is an example of a milestone.

3. What does an uncertainty space diagram measure?

1 / 1 point

- ☒ Ends uncertainty / Means uncertainty
- ☐ When a product is going to get built
- ☐ What you are going to build / How you are going to build it
- ☐ Ends / Means

**Correct**

Correct answer. An uncertainty space diagram measures a product's ends uncertainty and means uncertainty.

4. When a product is built, what would you expect the ends uncertainty and means uncertainty to be?

1 / 1 point

- ☒ Low ends uncertainty, Low means uncertainty
- ☐ High ends uncertainty, High means uncertainty
- ☐ High ends uncertainty, Low means uncertainty
- ☐ Low ends uncertainty, High means uncertainty

**Correct**

Correct answer. When a product is built, you have low ends uncertainty and low means uncertainty.

5. What does a Work Breakdown Structure represent?

1 / 1 point

- ☒ Breaking down a product into work products or tasks.
- ☐ The ends and means uncertainty.
- ☐ The demonstration of task dependencies.
- ☐ The variability in a project.

**Correct**

Correct answer. A Work Breakdown Structure is used for breaking down a product into work products.

6. **What can a Work Breakdown Structure be used for? Select three answers that apply.** 1 / 1 point

☒ Identifying work products.

**Correct**

This is a correct answer because a Work Breakdown Structure can be used for identifying work products.

☐ Determining the uncertainty in a project.

☒ Creating estimates.

**Correct**

This is a correct answer because a Work Breakdown Structure can be used for creating estimates.

☒ Generating developer tasks.

**Correct**

This is a correct answer because a Work Breakdown Structure can be used for generating developer tasks.

7. **\_\_\_\_\_ is what you are agreeing to deliver. \_\_\_\_\_ is a guess for the time it will take for your development team to complete a task. \_\_\_\_\_ is a point in the schedule to meet.** 1 / 1 point

☐ A target / A commitment / An estimate

☒ A commitment / An estimate / A target

☐ A commitment / A target / An estimate

☐ An estimate / A target / A commitment

**Correct**

Correct answer. A commitment is what you are agreeing to deliver. An estimate is a guess for the time it will take for your development team to complete a task. A target is a point in the schedule to meet.

8. Which of the following are non-negotiable? Choose all that apply.

Target

**Correct**

This is a correct answer because a target is non-negotiable.

Estimate

**Correct**

This is a correct answer because an estimate is non-negotiable.

Commitment
