

Software Product Management Capstone: Open Study Guide

In this course you will learn by doing. The practical nature of this course assumes that you have learned the relevant concepts from the previous courses:

- Introduction to Software Product Management
- Software Process and Agile Practices
- Client Needs and Software Requirements
- Agile Planning for Software Products
- Reviews & Metrics for Software Improvements

The attached SPM Capstone Open Study Guide provides a preview of Capstone activities and links to relevant lessons in previous courses. As a course companion, it will be a useful guide for reviewing concepts in preparation for Capstone assignments.
