

This is a map of the course that we had created for our own purposes but thought it may be useful for you. You can use the course map to schedule your learning, track your progress, discover certain course videos you want to watch, and much more.

This course map should be updated to match the current version of the course. It is formatted to print out nicely on a 11x17 (Ledger) sized piece of paper.

You can download the course map for this course here:

Course 4 - Agile Planning for Software Products - Course...
