Peer-graded Assignment: Module 3: User Stories Assignment (Graded)

Submit by Feb 24, 2:59 AM EST

Important Information

It is especially important to submit this assignment before the deadline, Feb 24, 2:59 AM EST, because it must be graded by others. If you submit late, there may not be enough classmates around to review your work. This makes it difficult - and in some cases, impossible - to produce a grade. Submit on time to avoid these risks.

Instructions

My submission

Read the provided scenario carefully. Identify as many requirements as you can. For each requirement identified, rewrite the requirement in the prescribed format for user story:

Discussions

"As a _____, I want to _____, so that _____"

Compile all the rewritten user stories into one document, upload your work to Coursera.

Review criteria   less

The peer review process gives you the opportunity to see a number of projects from your peers and be inspired by their approach. It also give you an opportunity to evaluate the assignments against the grading rubric and provide your MOOC-mates some suggestions on how to make their assignments even better. The median of the scores that you and other reviewers give the assignment will become the final score.

There are many different ways that you can word user stories. Please keep that in mind when you are reviewing the assignments of others. Please note that all feedback should be provided in English.

You will be asked to provide feedback to your peers in the following areas:

User Stories Provided (10 points total):

1. Were there 10 different user stories from the scenario provided? (10 points)

Format of User Stories (10 points total):

1. Are the user stories in the prescribed format "As a _____, I want to _____, so that _____"? (10 points)

User Stories Feature Appropriate User Types

1. Are the user stories written from the correct user type perspective? (i.e. "As a developer, I want…" or "As an account holder", I want…") (10 points)

Improvements:

1. Are there any requirements from the scenario that the user omitted?

2. Do you have any suggestions for how the learner could improve their user stories?
